

**Composition:**

**Drylief Eye Drops:** Each ml contains Carboxymethylcellulose Sodium USP 10 mg.

**Preservative:**

Sodium Perborate BP 0.02%.

**Pharmacology:**

Drylief contains Carboxymethylcellulose Sodium which acts as an ocular lubricant. It provides lubricating and hydrating protective shield on the ocular surface.

**Indications:**

Drylief is indicated for use as a lubricant in dry eye (keratoconjunctivitis sicca) including temporary relief of burning, irritation or discomfort due to dryness of the eye.

**Dosage and Administration:**

Instill one or two drops in the affected eye(s) as needed.

**Contraindications:**

Contraindicated in patients who are hypersensitive to any of the components of this preparation.

**Side-effects:**

Transient visual disturbance and eye discharge may occur.

**Use in special group:**

**Use in pregnancy:** There are no adequate and well-controlled studies in pregnant women. Carboxymethylcellulose Eye Drops should be used during pregnancy only if the potential benefit justifies the potential risk to the fetus.

**Use in lactation:** There are no adequate and well-controlled studies in lactating women. Caution should be exercised when Carboxymethylcellulose Eye Drops is administered to a nursing mother.

**Use in children:** Safety and effectiveness have not been demonstrated with this eye drops in pediatric patients.

**Use in elderly patients:** No information available.

**Storage:**

- Store below 30°C temperature in a dry place, protect from light.
- Do not use longer than 30 days after first opening.
- Keep out of the reach of children.

**Packing:**

**Drylief Eye Drops:** Each LDPE dropper bottle contains 10 ml sterile eye drops.
